EDUCATION

Bachelor of Digital Arts –
University of the Witwatersrand
Specialization: Game Design and
Interactive Media
Starting and Expected completion:
2023 - December 2026

National Senior Certificate
(Matric) – President High School

SKILLS

- Technical Skills
 - C#, HTML, CSS, JavaScript, React.js
 - Unity, Git / GitHub, Visual Studio, VS Code, Figma, Blender
 - UX research & wireframing
- Soft Skills
 - Creative problem solving
 - Collaboration & Teamwork
 - Communication
 - Time management
 - Adaptability

Jaiden Muruvan

WEB DEVELOPER | GAME DEVELOPER

I am a Bachelor of Digital Arts student with a strong foundation in design thinking, digital storytelling and creative problem solving. Experienced in academic and personal projects across digital media, UX / UI and visual design. Strong problem-solver with a passion for building systems and learning new technologies.

PROJECTS

INTERACTIVE MEDIA PROJECTS

Web Development

Built interactive web-based experiences using HTML, CSS and JavaScript. Created product requirement documents and designed user flows and wireframes. Focused on user interaction, responsiveness and logical flow. Debugged and refined features based on testing and feedback.

GAME PROJECTS

Unity / C# / Blender

Designed and developed core gameplay systems using unity and C#. Implemented player movement, collision handling, game state logic, scene management and multiplayer network handling. Applied object-orientated programming principles to maintain a clean and modular code.

ACADEMIC PROJECTS & PRACTICAL DEVELOPMENT

Completed multiple semester long development projects involving programming, testing and iteration. Worked independently and in small teams to design, build and refine interactive systems.
